

#### 4. Policy

##### a. Unofficial Travel:

While US citizens are not restricted by US laws from traveling in foreign countries, persons granted authorization for access to *information on sources or methods of* certain categories of extremely sensitive SCI incur a special obligation and are to be discouraged by the SIO from engaging in *Worked to the risks* unofficial visits to, or travel through, the countries listed in Appendix A. The DCI, in consultation with SIOs, will identify the categories having special sensitivity and the SIO should advise persons with such access that travel in the listed countries may result in the withdrawal of clearance for continued access to SCI.
